There are a few paid-for books though, and there's no way to separate the two

A Companion To Bioethics

A Companion to Bioethics presents the central issues and concepts in bioethics in an authoritative yet highly accessible manner. Now fully revised and updated to reflect the current state of the field, the 49 essays, each specially written by leading experts, span an unparalleled range of topics, including discussion of the moral status of embryos and fetuses, new genetics, life and death, resource allocation, organ donations, AIDS, human and animal experimentation, health care, and teaching.

A Companion to Bioethics: 9781444350845: Medicine & Health ...

"The second edition of A Companion to Bioethics, edited by ethicists Singer (Princeton) and Kuhse (Monash Univ., Australia), should be... a standard one-volume reference work in the field of bioethics. The book's helpful summary of the field's major debates makes it especially helpful for smaller collections that do not procure many of the increasingly specialized monographs on narrow bioethical issues.
