The N54 is part of the NG6 BMW engine family. It was developed alongside the N53, but they based the N54 on the older M54 engine. Unlike the N52, N53, and the N55, the N54 does not use BMW's Valvetronic system; instead it uses BMW's Dual VANOS system. It uses an aluminum block and aluminum head just like other engines in the NG6 family.
