Timber Frame Home Timber Frame homes can utilize a variety of external and internal materials, which can make the build unrecognizable as a timber-framed structure if desired. The main distinction in the architecture, compared to log homes, is the timber frame uses vertical posts and horizontal beams.

### What is a Timber Frame Home? | Timber Framing Explained 2020

Like every project, building a timber frame home starts on a piece of paper. Make sure your designer/engineer/architect/builder has specific experience building timber frame homes. Their expertise will ensure that your home is properly designed so that it will be strong, beautiful, and will cost less and last longer.

### 7 Considerations for building your timber frame home ...

A Hearthstone specialty since 1984. Timber Frames are built with massive timbers and a dizzying array of intricate, hand-pegged, mortise-and-tenon joinery. Creative surface textures: planed smooth with chamfered edges, hand hewn, Weatheraged, distressed, or any combination desired. The stunning frame, a descendant of centuries-old methods, is then married to a high-tech, extremely tight and energy efficient blanket of structural insulated panels.

### Timber Frame Homes by Hearthstone Homes

Timber frame homes typically cost more to build than a 2x4 "stick built" home. The reasons for this include the cost of a high quality wood timber frame (versus inexpensive wood studs), superior insulation, and the typical use of expansive glass areas.
