Charles Darwin Trivia Questions & Answers | Page 2

Darwin proposed natural selection. Natural selection is the pressure for species with advantageous traits to survive while those with less advantageous traits died. Darwin said that natural selection explained evolution. The Origin of Species was also important because it was the first time that a strong body of evidence, taken from a wide range of species and environments, had been assembled in support of evolution.

Charles Darwin: Study Questions | SparkNotes

11. What criticism did Jenkin bring against Darwin's theory of evolution by natural selection? The earth had not been in existence long enough for evolution to have taken place; The fossil record did not contain forms intermediate between today's species; Any new traits would disappear once they were blended with the population; All of the above

Five Questions About Evolution that Charles Darwin Can't Answer. By Wayne Jackson. At no time in the history of the modern evolutionary movement (i.e., since the publication of Charles Darwin's book, *The Origin of Species*, in 1859), has the world of evolutionary thought been in such a state of utter chaos. Theories hoary with aged respect are now under assault by a new breed of scientists, who can no longer live with the absurdities and inconsistencies of evolutionary propaganda.
