Community-based learning refers to a wide variety of instructional methods and programs that educators use to connect what is being taught in schools to their surrounding communities, including local institutions, history, literature, cultural heritage, and natural environments. Community-based learning is also motivated by the belief that all communities have intrinsic educational assets and ...

Community-Based Learning Definition

Additionally, quantitative proteomics and the MS-based quantification method can be used to quantify microbial activities across different environmental or operating conditions. This approach is based on the use of stable isotopes as mass-tags to label proteins, the tags can then be identified and quantified by the MS (Bantscheff et al., 2007).
