Description The Miniguide Mobility Aids is a handheld device that uses ultrasonic echo location to detect objects in front of the walker. Vibration rates increase as the walker gets closer to the object.

Mini Guide | Independent Living Aids

The Miniguide uses ultrasonic echo-location to detect objects. The aid vibrates to indicate the distance to objects - the faster the vibration rate the nearer the object. There is also an earphone socket which can be used to provide sound feedback. The Miniguide supplements the information provided by a guide dog or a cane.
