can take several different forms based on what we are multiplying. We will first look at multiplying monomials, then monomials by polynomials and finish with polynomials by polynomials.

Multiplying monomials is done by multiplying the numbers or coefficients and then adding the exponents on like factors.

Homework Answers - Twinsburg

Follow these same steps to use long division to divide polynomials. Divide: $6x^2 + 8x + 1$. Step 1
Divide the first term of the dividend, $6x^2$, by the first term of the divisor, $2x$. $3x$
 $3x \cdot 2x = 6x^2$
 $6x^2 + 8x + 1 - 6x^2 = 8x + 1$
Divide: $6x^2 + 8x + 1$ by $2x$

Bookmark File
