Parent and Student Study Guide Workbook

Pre-Algebra: A practical step-by-step approach b. B - C - D. c. B + C - D. d. B + D + C. If John starts with B bats and buys C more bats, the total number of bats John has would be represented by the formula B + C. When John gives D bats away, the sum of B + C would subtract D bats to determine how many he has left.

$19(10) - 8 = 190 - 8 = 182$. 182 is much less than 600, so this guess is much too low. Try $x = 30$: $19(30) - 8 = 570 - 8 = 562$. 562 is still less than 600, so this guess is still too low. Try $x = 35$: $19(35) - 8 = 665 - 8 = 657$. 657 is greater than 600, so this guess is too high. Therefore, x is between 30 and 35.
