A DVD is composed of several layers of plastic, totaling about 1.2 millimeters thick. Each layer is created by injection molding polycarbonate plastic. This process forms a disc that has microscopic bumps arranged as a single, continuous and extremely long spiral track of data. More on the bumps later.

DVD Layers - How DVDs Work | HowStuffWorks

Part 1 - NAT Syntax. There are two sets of syntax available for configuring address translation on a Cisco ASA. These two methods are referred to as Auto NAT and Manual NAT.The syntax for both makes use of a construct known as an object.The configuration of objects involve the keywords real and mapped.In Part 1 of this article we will discuss all five of these terms.
