the face that control chewing and moving the jaw. Cleveland Clinic is a non-profit academic medical center. Advertising on our site helps support our mission.

Temporomandibular Disorders (TMD) - Cleveland Clinic

The temporomandibular joint (TMJ) acts like a sliding hinge, connecting your jawbone to your skull. You have one joint on each side of your jaw. TMJ disorders — a type of temporomandibular disorder or TMD — can cause pain in your jaw joint and in the muscles that control jaw movement.

Temporomandibular Joint Disorders (TMD)

An injury to the jaw or temporomandibular joint can cause TMD. A heavy blow, for example, can fracture the bones of the joint or damage the disc, disrupting the smooth motion of the jaw and causing pain or locking. Arthritis in the jaw joint may

also result from injury and cause pain.

Other causes of TMD are less clear.
