— César Hidalgo, *Why Information Grows: The Evolution of Order, from Atoms to Economies* “In a physical system, information is the opposite of entropy, as it involves uncommon and highly correlated configurations that are difficult to arrive at.”

Why Information Grows Quotes by César A. Hidalgo

Conveying know-how is difficult, and becoming more so as time goes by and the economy becomes more diverse and complex. The “computational capacity” of the economy needs to grow, but it is constrained by the ability for knowledge and know-how to be embodied in networks of people – hence the value of trust, as it makes that easier.
