available Microsoft system and software updates and distributing them to client computers.

7 Best Windows Server Update Service Tools Reviewed in 2020

Without FCS, the most you should set in relation to Windows Updates is the Configure Automatic Updates policy to Disabled and forcing the Automatic Updates service to Automatic. With FCS, as described above, this gets a little more complicated because you have to remember that WSUS is actually distributing updates for Forefront and thus the WUA has to be configured accordingly which may subject your users to the double restart notifications and the “uncontrolled” push of an updated WUA.

ConfigMgr Software Update Management and Group Policy ...

WSUS is typically the first choice for companies looking to automate their Windows patch management. When it was first released back in 2003, WSUS was life-changing for IT administrators everywhere. And while it still may be better than patching things manually, the problem with WSUS is that it may not be the best bet for addressing the security needs of the modern digital landscape.
